User Guide
Mail Preferences

Creating a Mail Preference

The mail Preference require a set-up, this adds a Mail Preference Title to your group. This allows you to set up as many Mail Preferences as you wish. For example if you are a social group you may have a bulletin which you periodically distribute, this may go out to the members and perhaps some non members who you wish.

If you wish to use this functionality then set up the preferences for your group from the menu.

The selection will then appear on the mail selection for the group manager.
